

RAIL Back on Track's New Bus Network Proposal

Residents can now compare BCC's Bus Network and our new Hi Quality Bus Network proposal. Featuring interactive mapping and aerial photography, residents can zoom in on their house, their suburb, their workplace and compare the quality of BCC's bus service in their area with RAIL Back on Track's New Bus Network proposal.

See how strong or weak the bus network is in your area, its overall quality and how it fits into the wider bus network. People with Google Earth may also download the maps and see individual routes. Don't forget to share on Facebook and Twitter

To see the maps, take our bus reform survey, at <http://tiny.cc/busreform>.
